---> create element (single, multiple)

```
<div id="a">
  <h1>RAVITEJA</h1>
  <h1>GANESH</h1>
</div>
<div id="b">
  <h1 id="r">YASH</h1>
  <h1>GOPI</h1>
  <h1>NANI</h1>
</div>
<script>
  let n=document.createElement('h1')
  n.textContent="MALLI"
  let p=document.getElementById('b')
  let l=document.getElementById('r')
  p.insertBefore(n,l)
</script>
```

Output:

RAVITEJA
GANESH
MALLI
YASH
GOPI
NANI

Example2:

```

<div id="a">
  <h1>RAVITEJA</h1>
  <h1 id="d">GANESH</h1>
</div>
<div id="b">
  <h1 id="r">YASH</h1>
  <h1>GOPI</h1>
  <h1>NANI</h1>

</div>
<script>
  let n=document.createElement('h1')
  n.textContent="MALLI"
  let p=document.getElementById('b')
  let l=document.getElementById('r')
  p.insertBefore(n,l)
  let nn=document.createElement('h1')
  nn.textContent="ANWAR"
  let pp=document.getElementById('a')
  let ll=document.getElementById('d')
  pp.insertBefore(nn,ll)
</script>

```

Output:

RAVITEJA
ANWAR
GANESH
MALLI
YASH
GOPI
NANI

Remove element:

Let b=document.getelementbyid('e')
b.remove()

To remove child element:

Removechild();
