Practice

01 February 2025   11:34

```html
<script>
    let amount=prompt("Enter the amount customer spends")
    if(amount>100){
        let discount=amount*0.2
        let final=amount-discount
        document.write("The final bill is:"+final)
    }
    else if(amount>50 && amount<=100){
        let discount=amount*0.1
        let final=amount-discount
        document.write("The final bill is:"+final)
    }
    let customer=confirm("are you premium number?")
    if(customer){
        let discount=amount*0.05
        let final=amount-discount
        document.write("The final bill is:"+final)
    }

</script>
```

Output:

The final bill is:90

```html
<script>
    let age = parseInt(prompt("Enter your age:"))

    if(age>=18 ){
       let citizen = confirm("Are you a citizen?")
    let passedCitizenTest = confirm("Have you passed citizen test?")
       document.write("You are eligible to vote")

       if(age>=18 && !citizen && passedCitizenTest){
          document.write("You are eligible to vote")
       }

    }else{
       document.write("You are not eligible to vote")
    }
  </script>
</body>
</html>
```

Output:

18
You are eligible for vote
